

## PRIVACY POLICY

**1. DATA COLLECTION** GeoTrackPro hardware collects telemetry data (GPS location, speed, heading) and, in the case of AI Vision products (JC450), video footage.

This data is transmitted via LTE to the server designated in your account.

**2. HOW WE USE DATA** The data collected is used strictly to provide the tracking and safety services you have purchased. We do not sell your location history, video data or any other information to third-party advertisers.

**3. DATA SECURITY** We implement industrial-grade encryption for data in transit between the device and the server. However, the Customer is responsible for maintaining the security of their "Portal" login credentials and the security of DATA he downloaded from the server to his local informatic system.

**4. THIRD-PARTY SERVICES** Our devices utilize Global SIM cards and Google Maps for visualization. These providers have their own privacy policies regarding the handling of raw technical data required to maintain a connection.

**5. YOUR RIGHTS** You have the right to request the deletion of your historical tracking data at any time, subject to local data retention laws for logistics and safety records.
